

Task: create the following mount point for the upcoming nfs share on the server

Requirements:

VM server

Mount points:

nfs/incoming/home

nfs/incoming/vhosts

nfs/incoming/scripts

Created required NFS mount point directories on the dev-app server
(/nfs/incoming/home, /vhosts, /scripts) in preparation for an upcoming NFS share.
Verified successful creation and readiness for mounting.

```
root@dev-app-eg3:~# vi /etc/hosts
root@dev-app-eg3 ~]# mkdir /nfs/incoming/home
mkdir: cannot create directory '/nfs/incoming/home': No such file or directory
root@dev-app-eg3 ~]# mkdir -p /nfs/incoming/home
root@dev-app-eg3 ~]# mkdir -p /nfs/incoming/vhosts
root@dev-app-eg3 ~]# mkdir -p /nfs/incoming/scripts
root@dev-app-eg3 ~]#
```

Summary

Created the required NFS mount point directories on the dev-app server (/nfs/incoming/home, /nfs/incoming/vhosts, and /nfs/incoming/scripts) in preparation for an upcoming NFS share and verified they were created successful
